

W51

RAR-XL

- CALTECH Optical Observatories orders IR fused silica windows with RAR-XL Nano-Texturing. (TLZCAL05q, BAKER)
 - Looking for highest transmission very long wave NIR, 1800-2400nm. RAR nano-texturing confined to central 32mm (1.25") Ø area.
 - 2"Ø, 3/16" thick, Corning 7979, IR Fused Silica, PETG packs. TelAztec ID #: W51-IR-044-045-RAR-XL, R<0.05% at 1000-1500nm

0.3

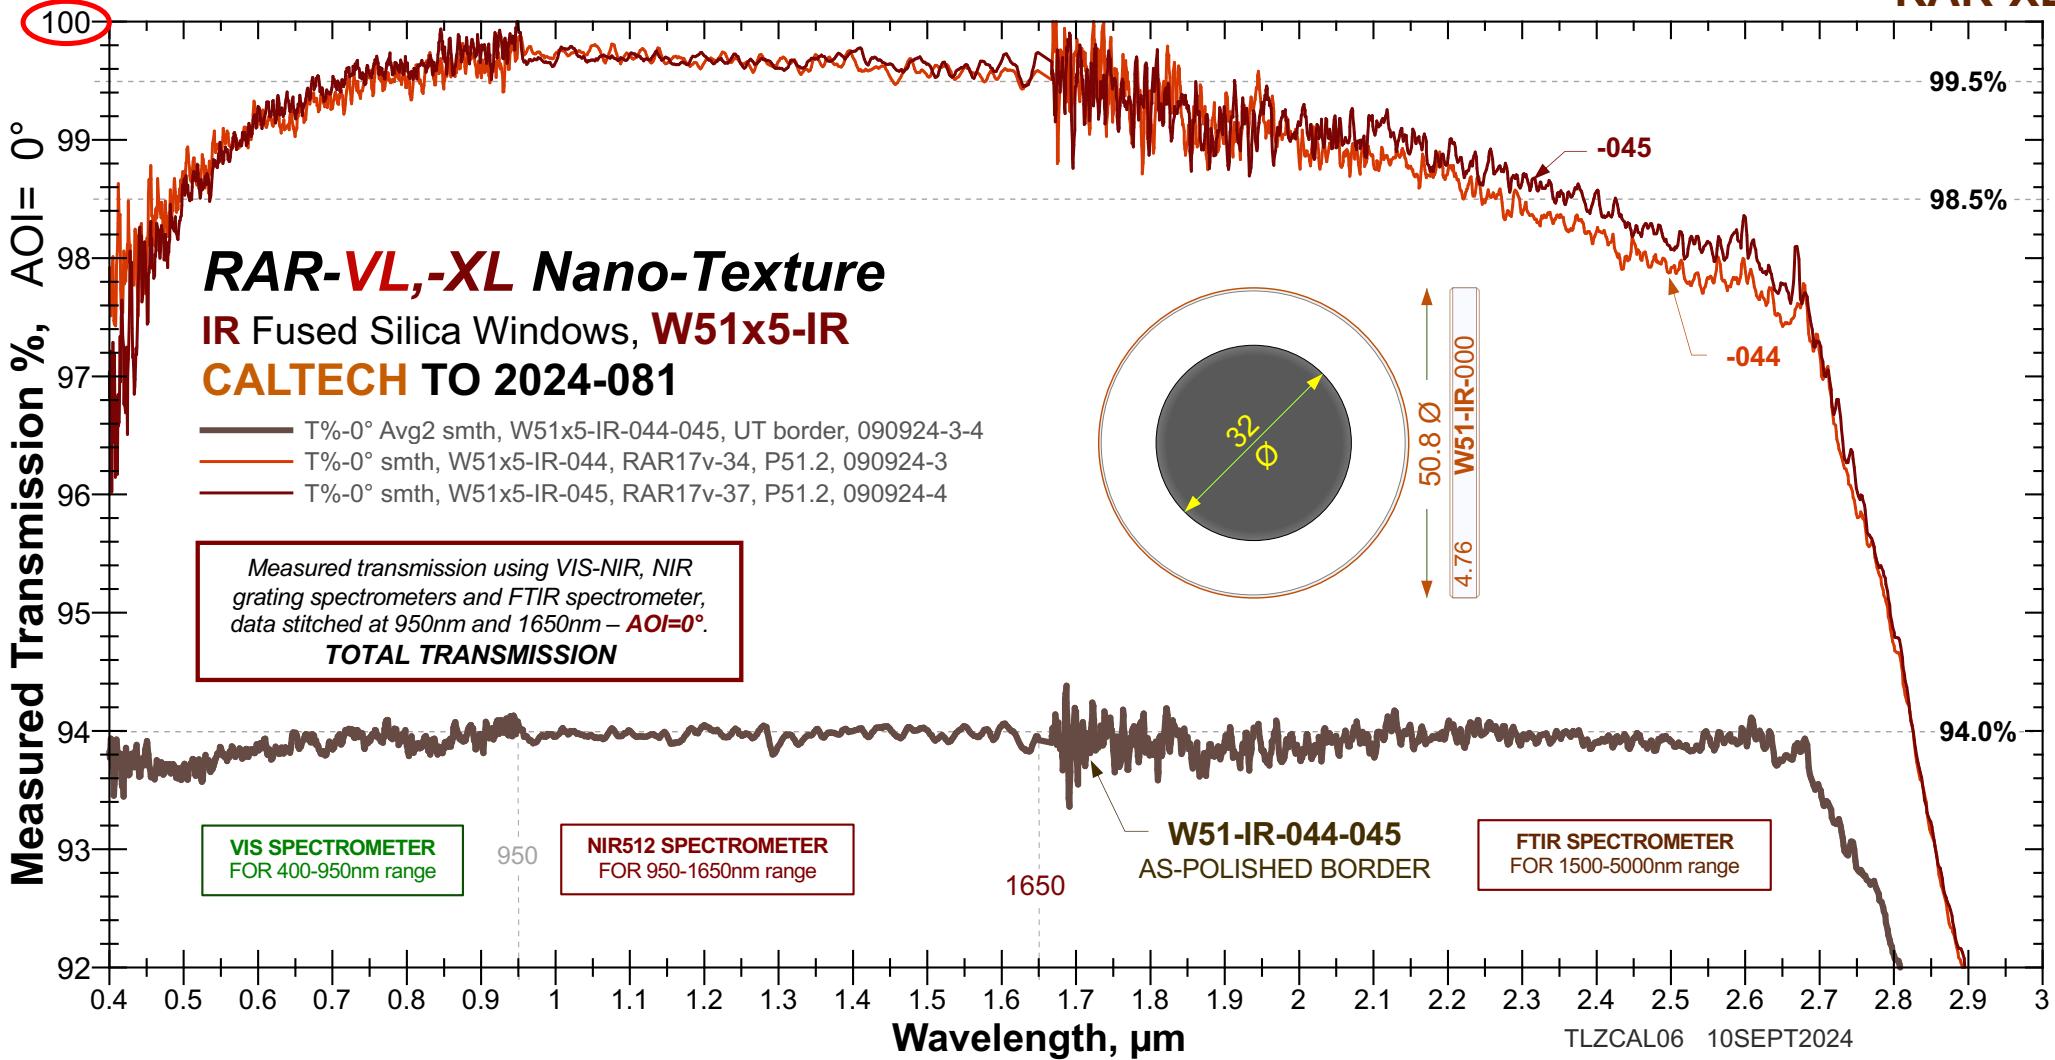

- Uniform, high performance RAR nano-texturing. R<0.05% 500-1500nm,

- **CALTECH Optical Observatories orders IR fused silica windows with RAR-XL Nano-Texturing.** (*TLZCAL05q, BAKER*)
 - **Looking for highest transmission very long wave NIR, 1800-2400nm.** RAR nano-texturing confined to central 32mm (1.25") Ø area.
 - **2"Ø, 3/16" thick, Corning 7979, IR Fused Silica, PETG packs.** TelAztec ID #: **W51-IR-044-045-RAR-XL**, R<0.05% at 1000-1500nm
